 Providing Wood waste recycling, Bio economy leadership solutions*

The Canadian Wood Waste Recycling, Business Group was established in 2016 as a national industry business group providing indispensable closed loop Wood waste recycling leadership knowledge, business and industry guidance in the development of the Canadian Wood waste recycling, Bio economy.

As globally established all Wood waste can be recycled, both used cleaned & treated Wood waste materials.

The Canadian Wood Waste Recycling, Business Group provides each of our registered industry business associates with a tailor-made business-to-business resource management services ranging from and including; evaluation, development and expansion, technology, supply chain, transportation, grant funding sourcing, sales & marketing strategies, workshops, industry development and support.

### **Three Core Commercial and Retail Wood Waste Recycling Business Opportunities**

#### **1. Reprocessing / Grinding, Screening 2. Remanufacturing 3. Barn Wood**

As established there are three main CWWR, Business Group industry branding names for our commercial and retail operative Wood waste recycling facility business operations in CANADA;

**Reprocessing:** – The process of Grinding, Shredding or Screening of the Wood waste material to be readied for the reuse markets. (Commercial, Governmental or Private Landfill, recycling facility)

**Remanufacturing:** – The process of Sawmilling, Kiln drying, Plane or Mill the recycled Wood to be readied for the reuse markets. (Commercial/Retail facility)

**Barn Wood:** – The process of sorting the recyclable used Barn Wood, used wood into an inventory sort to be readied for the reuse markets. (Commercial/Retail facility)

As described the above Wood waste recycling — business operations will vary from location to location, based on medicating circumstances, such supply chain, industry education, commercialization, population, location, local landfill recycling policies, Wood recycling business plan, governance, endorsement and developing an outsource reuse supply and demand market for the recycled Wood material or product.

Upon approval, the CWWR, Business Group assist's each respective associate through their initial research feasibility phase, development, implementation, commercialization, marketing and support of their specialized Wood waste recycling, Bio economy program and related services through our industry business resource management services.
